

Overview

Serving the underserved is always one of the major missions for Altai Technologies. Altai has been looking for chances to spread the benefits of WiFi technologies all over the world.

This time, Altai Technologies has worked with The Boys' & Girls' Clubs Association of Hong Kong (BGCA) to launch a flagship program, "Treasure Trove - Connect • Love," with a purpose to support children and youth in a disadvantaged environment and provide them with WiFi services enhancement.

Altai donated a total of ten units of A3c, A2c and C2s to BGCA for deployment in their centres at different locations to support this program. Most of the devices were decorated by children joining the program before installation; they have now been used for the centres' daily operations and online services enhancement.

The WiFi network supported by Altai's devices provide a comprehensive coverage for the centres and offloaded 6 of the busiest locations of BGCA. At the same time, the WiFi network is also bringing benefits to all the service users while it is freely open for their usages.

Customer Name:

The Boys' & Girls' Clubs Association of Hong Kong (BGCA)

Deployment Location:

Several districts in Hong Kong

Application:

Private network

Products used:

A3c, A2c, C2s

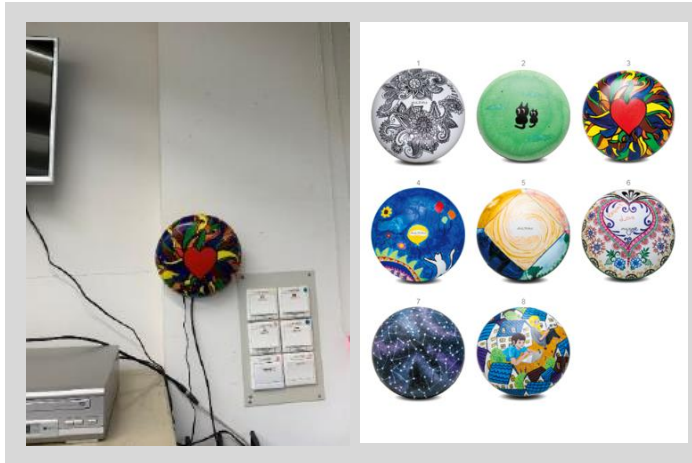

Result:

Altai's indoor equipment has perfectly suited BGCA's needs. With the smart antenna technology, Altai's APs can provide larger coverage than usual AP. Altai's AP could be easily installed, user-friendly and the signal strength remains stable for all the covered areas.

Altai Super WiFi expects their technologies can further improve the lives of underserved children all over the world.

The Challenge

- Large area coverage
- High density indoor environment

The Solution

A total of 10 units of A3c, A2c and C2s have been installed in 6 different BGCA centres after applying nicely paintings by children who participated in the “Treasure Trove - Connect • Love ” program. The devices provided a full coverage among the areas which used to be the heavily-loaded locations of BGCA.

The Result

Altai's indoor equipment has perfectly suited BGCA's needs. With the smart antenna technology, Altai's APs can provide larger coverage than usual AP. Altai's AP could be easily installed, user-friendly and the signal strength remains stable for all the covered areas.

The deployed network is now benefiting the service users of BGCA. Altai Super WiFi expects their technologies can further improve the lives of underserved children all over the world.

About Altai

Altai Technologies is a leading supplier of carrier-grade Wi-Fi products and technologies with a distribution network reaching 100 countries. Altai Super WiFi is the leading solution for vertical industrial markets, covering over 200 terminal ports and airports globally.

The Altai Super WiFi Solution includes a complete portfolio of indoor and outdoor products for carriers, WISPs, and enterprises to support a wide range of applications such as mobile data off load, public access, WLAN access, and backhaul.

Utilizing patented smart antenna technology, as well as a cloud-based management system called AltaiCare, the Altai Super WiFi Solution is designed from the ground up to deliver WiFi networks that have unprecedented performance, reliability, scalability, and manageability.
